PERSONAL PROFILE

Highly motivated and driven Information Technology student with a foundation in financial technology and software development. Passionate about applying strong technical skills in programming, web development, and blockchain to contribute effectively to an IT team. Known for a proactive learning approach, excellent teamwork, adaptability to dynamic, fast-paced environments and love solving problems.. Seeking an internship opportunity to leverage my expertise in Python, JavaScript, Node.js, Solidity, and MySQL, contributing to innovative IT solutions and organizational success

PROJECTS

Barbershop Appointment App

- Developed an appointment app for users to book a haircut appointment
- Integrated PayPal and NETS for seamless payments on appointments
- Technical Skills: EJS for dynamic web pages, HTML and Bootstrap for responsive design, CSS for styling, and MySQL for database integration. I used JavaScript to handle user interactions and streamline form submissions.

WORK EXPERIENCE

LF Logistics

Logistic Assistant | 2022 - 2023

- Adapted to the high pace environment scanning, sorting, and packing of goods in a fast-paced warehouse environment.
- Skills Utilized: Attention to detail, efficiency in operational processes, time management, and adaptability to varied logistical tasks.
- Achievements: Enhanced workflow speed and accuracy, contributing to effective inventory management and customer satisfaction.

EDUCATION

Diploma in Financial Technology

Republic Polytechnic | 2023 - Present

Related Modules: Blockchain, Programming, Data Analytics, Database Systems

GCE "O" Levels

Zhenghua Secondary School| 2019-2022

KEY SKILLS

- Proficient in HTML, Python (Wing IDE), JavaScript, Node.js, Solidity, CSS, EJS, and MySQL, with hands-on experience in developing both frontend and backend components for web applications.
- Adept in Power Bi and Tableau
- Expertise in SAP ERP Systems
- Problem-Solving: Skilled at diagnosing issues, identifying solutions, and implementing effective strategies to improve functionality and optimize processes
- Attention to Detail: Focused on accuracy and thoroughness, ensuring that code, configurations, and documentation are correct and effective
